Interstate Management Program Project  
Listing

# 2021 INTERSTATE MANAGEMENT TRANSPORTATION IMPROVEMENT PROGRAM PROJECT LIST

Prepared by PennDOT's Center for Program Development and Management, provided statewide as part of regional Transportation Improvement Program Public Comment Period

April 30, 2020

## **Pennsylvania Interstate Management Program**

The Interstate Management (IM) Program is a separate Transportation Improvement Program (TIP) that is centrally developed and managed based on statewide needs. Pennsylvania has one of the largest Interstate Systems in the nation, with more than 2,740 miles and 2,207 bridges. Based on asset condition it is estimated that the annual need on the Interstates is \$1.2 Billion to meet basic maintenance and preservation needs. Currently we spend between \$450-\$500 million per year on the Interstate System.

From a programming standpoint, the IM Program is constrained to an annual funding level provided as part of Financial Guidance. Working in collaboration with our Metropolitan Planning Organizations (MPOs) and Rural Planning Organizations (RPOs), PennDOT issued 2021 Financial Guidance that increases Interstate Investments by approximately \$150 million in Federal Fiscal Year (FFY) 2021 and grows by \$50 million per year up to \$1 billion in 2028.

To more efficiently manage the significant needs of the Statewide Interstate System, PennDOT formed an Interstate Steering Committee (ISC) in summer of 2015. The ISC contains representation from PennDOT's Center for Program Development and Management (CPDM), the Bureau of Maintenance Operations (BOMO), the Bureau of Project Delivery (BPD), and the Districts. The ISC works with PennDOT, MPO/RPOs, Federal Highway Administration (FHWA) and State Transportation Commission (STC) on the development and management of the IM Program. They assist with project prioritization and re-evaluate projects during Program updates. The ISC meets monthly to assist with the management of the IM Program.

As part of the 2021 Program Update the ISC had each District present their Interstate program. The presentations occurred in July 2019. Presentations provided updates on conditions, challenges, best practices and needs for each District. All presentations were available via web conference so other Districts, MPO/RPOs and FHWA could participate. In addition to the presentations, the ISC also held Interstate Rides. ISC members, Central Office Asset Management and Planning staff, as well as, District staff rode all 2,740 miles of the Interstate System in May and June 2019. The District Interstate rides provided a statewide perspective of current conditions, as well as, an opportunity to review currently planned and potential projects.

### **Project Prioritization**

In coordination with the District presentations, the individual Districts provided prioritized lists of Interstate needs. These lists were compiled into a statewide prioritized Interstate needs list.

To help evaluate and prioritize projects on the Interstate, the Bridge Asset Management System (BAMS) and Pavement Asset Management System (PAMS) were utilized to provide an optimized program based on Lowest Life Cycle Cost (LLCC) principals. BAMS and PAMS were utilized to produce a fiscally unconstrained run with no committed projects to determine which existing projects would align with LLCC principals. The candidate projects were then compared and rated with a high-medium-low rating against the LLCC principals from the fiscally unconstrained runs. Project bridge and pavement data and guidance from Chapter 13 of [Publication 242](#) were also used in project selection. Pennsylvania's Transportation Asset Management Plan (TAMP) defines how LLCC is required and is applied to planning and programming.

Initial programming consideration is given to currently programmed projects that carry over from one State Transportation Improvement Program (STIP) to another. The carry-over projects were prioritized based on current field conditions and asset management criteria. Consideration was also given to project development process and current project schedules when developing the 2021 IM Program.

Due to the formula adjustments and focus on the Interstates, MPO/RPOs requested the IM Program carry mainline Interstate projects that were previously funded by the regions on various regional TIPS. The regional carryover projects have been coordinated with the ISC and included on the IM Program. A list of these projects is attached. These projects will be drawn down from Regional IM Carryover Reserve – 2021 IM Update (MPMS 114199) line item and added to the IM TIP after STIP adoption.

During development of the IM TIP, consideration was given to Intelligent Transportation Systems (ITS) and various safety measures. Line items were programmed for ITS and All-weather Pavement Markings (AWPM), each of which will be ramped up over the first four years of the Interstate Twelve Year Program (TYP). The ITS line item will focus on addressing antiquated devices, new devices, and equipment gaps on the Interstate system. The AWPM line item will focus on the deployment of AWPMs as the center line for interstates statewide.

The remaining funds for the 2021 IM Program will fund new LLCC principal projects. The District prioritized lists were compared with the BAMS and PAMS runs. Projects with high District and High Asset Management Priorities were added to the Program as new projects.

Funds that were not allocated to projects were programmed in a set-aside line item to address programmatic contingencies, emergencies, and necessary project cost adjustments (increases and decreases). The line item will also be utilized to account for any obligation conversions that were anticipated to occur prior to end of the 2019 program and didn't get converted. The line item is continually monitored and if not necessary for

programmatic contingencies or emergencies it is used to advance other prioritized needs. The draft IM Program was shared with the ISC, Districts and MPO/RPOs on November 27, 2019 and March 4, 2020.

## **Secretary's Discretionary Funding**

Financial Guidance includes a set-aside of several highway funding programs that are reserved for the Secretary of Transportation discretion, commonly referred to as "Spike" funding. The Secretary's "Spike" funding is fiscally constrained to an annual fund level provided by Financial Guidance. As part of the Secretary's recommended discretionary (Spike) funded projects for the 2021 Program, several major Interstate Projects were included that otherwise would not have been able to advance and are vitally important to maintaining and improving our Interstate infrastructure. The spike funded Interstate Projects are included in the 2021 IM Program and are listed on the recommended spike funded projects for the 2021 Program.

## **National Highway Freight Program**

The National Highway Freight Program (NHFP) was a new program authorized under the Fixing America's Surface Transportation (FAST) Act to improve the efficient movement of freight on the National Highway Freight Network (NHFN) and support several important goals, including: (1) investing in infrastructure and operational improvements that strengthen economic competitiveness, reduce congestion, reduce the cost of freight transportation, improve reliability, and increase productivity; (2) improving the safety, security, efficiency, and resiliency of freight transportation in rural and urban areas; (3) improving the state of good repair of the NHFN; (4) using innovation and advanced technology to improve NHFN safety, efficiency, and reliability; (5) improving the efficiency and productivity of the NHFN; (6) improving State flexibility to support multi-State corridor planning and address highway freight connectivity; and (7) reducing the environmental impacts of freight movement on the NHFN. [23 U.S.C. 167 (a), (b)]. The Statutory citation for the NHFP is: FAST Act § 1116; 23 U.S.C. 167

Per 2021 Financial Guidance all NHFP funds have been allocated to the Interstates and included on the IM Program with the fund type NFP. Projects were based on the following considerations:

- Factors from the state's Comprehensive Freight Movement Plan, including:
  - Freight bottlenecks;
  - Freight efficiency projects; and
  - Projects as identified by the state's MPOs/RPOs.
- Estimated let dates: projects that haven't been let but will be let within the Program period.
- Estimated construction costs: projects that had a cost greater than \$50 million.

National Highway Freight Program Projects:

MPMS	District	County	Project Title
79904	6	Philadelphia	I-95: Betsy Ross Ramps A&B
57921	5	Monroe	I-80/Exit 308 Realignment
97828	8	Dauphin	I-83 East Shore (Section 3)
92924	8	York	I-83, North York Widening
105438	11	Allegheny	I-376, Commercial Street Bridge
113357	8	Dauphin	I-83 East Shore (Section 3B)
79828	6	Philadelphia	I-95: Race - Shackamaxon
103559	6	Philadelphia	I-95 Betsy Ross Mainline SB
103558	6	Philadelphia	I-95SB: Ann St-Wheatshaf Lane
113380	8	Dauphin	I-83 Eisenhower Interchange D
106746	99	Central Office	National Highway Freight Program Reserve

The Interstate Management Program will be included with regional TIP public comment periods. The IM TIP is listed below. Upon approval of the STIP, Interstate projects will be monitored and managed based on scope changes and project schedules. The ISC will review requested increases and decreases.

**2021 INTERSTATE MANAGEMENT  
TRANSPORTATION IMPROVEMENT PROGRAM  
PUBLIC NARRATIVE REPORT**

**Allegheny**

**PennDOT Project Id:** 81931

**Project Administrator:** PennDOT

**Title:** I-79, Campbell's-Moon Run

**Improvement Type:** Restoration

**State Route:** 79

**Municipality:** Robinson (TWP)

**Air Quality Status:** Exempt from Regional Conformity Analysis

**Estimated Construction Bid Date:** 3/10/22

**Air Quality Exempt Reason:** S10 - Pavement resurfacing and/or rehabilitation

**Actual Construction Bid Date:**

**Location:** Located on I-79, Campbells Run to Moon Run, just past Crafton exit in Kennedy & Robinson Townships, Allegheny County

**Project Description:** Resurfacing, guiderail upgrades and new pavement markings on I-79 from Campbells Run to Moon Run and bridge preservation on I-79 over State Route 22, I-79 over Campbells Run Road and I-79 over State Route 60 in Kennedy and Robinson Townships, Allegheny County.

PennDOT Project Id: 99874

Project Administrator: PennDOT

Title: Pkwy East Corridor Transp Ph 2

Improvement Type: Safety Improvement

State Route: 376

Municipality: Pittsburgh (CITY)

Air Quality Status: Significant: Included in regional conformity analysis

Estimated Construction Bid Date: 3/15/25

Actual Construction Bid Date:

Location: Parkway East Corridor Transportation Network for I-376 between Downtown Pittsburgh and Monroeville in Allegheny County.

**Project Description:** Corridor improvements to improve safety and mobility for all modes of transportation in the I-376 Corridor for both the mainline of I-376 as well as parallel alternate routes and routes which distribute traffic to and from the mainline between Downtown Pittsburgh and Monroeville in Allegheny County. Alternatives range from system wide improvements on the mainline such as ramp management, truck restrictions, and managed lanes; to more specific interchange geometric improvements such as eliminating weave movements at Squirrel Hill and Churchill interchanges or combining and eliminating ramps at Edgewood Swissvale and Wilkinsburg.

**PennDOT Project Id:** 106682

**Project Administrator:** PennDOT

**Improvement Type:** Reconstruct

**Municipality:** Moosic (BORO)

**Title:** Scranton Beltway/Turnpike

**State Route:** 81

**Air Quality Status:** Significant: Included in regional conformity analysis

**Estimated Construction Bid Date:** 4/1/22

**Actual Construction Bid Date:**

**Location:** Lackawanna and Luzerne Counties, Borough of Dupont, Pittston Township, South Abington Township, I-81 and I-476 (The Turnpike),

**Project Description:** This project will link Interstate 81 and the Pennsylvania Turnpike's Northeastern Extension (I-476), creating a beltway around the City of Scranton. The project will widen I-81 to six lanes and provide new ramps to connect I-81 and the Turnpike (I-476), south of Scranton in the Borough of Dupont and Pittston Township, in Luzerne County and to the north of Scranton in South Abington Township, Lackawanna County.

This is a joint project between the Pennsylvania Turnpike Commission and the Pennsylvania Department of Transportation (PennDOT). New highway-speed connections from I-81 to Turnpike (I-476) in northbound and southbound directions.

**Monroe**

PennDOT Project Id: 57921

**Project Administrator:** PennDOT

**Title:** I-80/Exit 308 Realignment

**Improvement Type:** Interchange Improvement

**State Route:** 80

**Municipality:** East Stroudsburg (BORO)

**Air Quality Status:** Significant: Included in regional conformity analysis

**Estimated Construction Bid Date:** 8/20/20

**Actual Construction Bid Date:**

**Location:** I-80/SR2017 Interchange in East Stroudsburg Borough, Monroe County.

**Project Description:** The reconstruction of the Exit 308 Interchange of Interstate 80 includes ramps upgrades via acceleration and deceleration roadway lengthening and the replacement of the bridge carrying SR 2017 (Prospect Street) over I-80.

The dual bridges carrying I-80 over Lincoln Avenue/Forge Road and an active railroad track will also be replaced to accommodate future widening of I-80 to six lanes.

SR 2017 (Prospect Street) to be widened with the addition of turning lanes and the installation of new traffic signals.

Project design also includes construction of two roundabouts, one at I-80 and SR 2017 (Prospect Street) interchange, and second on the eastern side of I-80 at Green Tree Drive.

Project lies within the Borough of East Stroudsburg, Monroe County.

Title: I-80 - I-380 to Tannersville Resurface

Improvement Type: Resurface

State Route: 80

Municipality: Pocono (TWP)

Air Quality Status: Exempt from Regional Conformity Analysis

Estimated Construction Bid Date: 1/8/21

Air Quality Exempt Reason: S10 - Pavement resurfacing and/or rehabilitation

Actual Construction Bid Date:

Location: I-80, I-380 Interchange to Bartonsville, Monroe County

**Project Description:** This project involves the milling and resurfacing of EB & WB mainline and shoulders of (I-80) with stone matrix asphalt mixture design, bituminous milling, concrete and bituminous patching, Type 6-SP shoulders, all-weather pavement markers, line painting, MASH standard guiderail, and bridge preservation activities, along with other miscellaneous construction items.

The Scotrun (SR 8006) and Tannersville (SR 8008) interchange work involves the milling and resurfacing with superpave asphalt mixture design, bituminous milling and patching, line painting along with other miscellaneous construction items.

The project is located in Monroe County; Pocono, Stroud, and Hamilton Townships from segment 2940/0 & segment 2941/0 to 3014/2640 & 3015/2658 including SR 8006 and SR 8008 for a construction distance of approximately 16.52 miles (87,266 FT)

Title: I 80 Phase 2 - Reconstruction (Bartonsville)

Improvement Type: Reconstruct

State Route: 80

Municipality: Hamilton (TWP)

Air Quality Status: Exempt from Regional Conformity Analysis

Estimated Construction Bid Date: 1/13/28

Air Quality Exempt Reason: S10 - Pavement resurfacing and/or rehabilitation

Actual Construction Bid Date:

Location: I-80 Monroe County, Seg 2990 Offset 0000 to Seg 3030 Offset 2640, Seg 2991 Offset 0000 to Seg 3031 Offset 2640, Pocono, Hamilton, and Stroud Twps.

**Project Description:** The project is reconstruction of Interstate 80 from the SR 4012 (Warner Street) Bridge over Interstate 80 (Seg 2990 Offset 0000 & Seg 2991 Offset 0000) to beyond SR 33 Interchange (Seg 3030 Offset 2640 & Segment 3031 Offset 2640) including SR 33 Interchange. All Bridges on and over I-80 will be rehab or reconstructed to accommodate I 80 widening. I-80 will be widened to match the improvements planned in Stroudsburg and East Stroudsburg. for a total project length of 11.41 miles. This project will receive MASH guiderail replacement, glare screen barrier, and ITS updates along the corridor.

**Philadelphia**

PennDOT Project Id: 47811

**Project Administrator:** PENNDOT

**Title:** I-95: Bridge St DESIGN

**Improvement Type:** Interchange Improvement

**State Route:** 95

**Municipality:** Philadelphia (CITY)

**Air Quality Status:** Significant: Included in regional conformity analysis

**Estimated Construction Bid Date:**

**Actual Construction Bid Date:**

**Location:** CITY OF PHILADELPHIA

**Project Description:** This project provides for design of I-95 Reconstruction SR 0095 Section BSR, also known as the Bridge Street Ramps Section, and will eliminate the lane drop at the James St. Ramp in the southbound direction and will eliminate the add lane at the Bridge St Acceleration Ramp in the northbound direction. The proposed SR 0095 will have four lanes in each direction from Orthodox St. to Levick St. with exclusive acceleration/ deceleration lanes at the interchanges. The project will consist of six dual structures, and the Bridge Street Acceleration Ramp Bridge. All retaining walls supporting SR 0095 will be totally reconstructed to support the new widened roadway and ramps. In addition, the project consists of 1.7 miles of reconstruction and realignment along SR 0095, as well as 0.7 miles of reconstruction along Tacony Street from Aramingo Ave. to the west to just prior to Van Kirk St. to the east. Approximately 1.2 miles of reconstruction along Aramingo Ave. is anticipated from Frankford Creek to the south to the Amtrak Railroad Bridge to the north. A portion of Aramingo Ave. will also be widened from Orthodox St. to Tacony St. along the SR 0095 side of Aramingo Ave. The Aramingo Avenue/Betsy Ross Interchange will be reconfigured to realign the planned Adams Avenue Connector to intersect Aramingo Ave. adjacent to the Frankford Creek Bridge. Additional ramps will be constructed between the Betsy Ross Bridge and the SR 0095/Aramingo Ave Interchange to accommodate all traffic movements from the Betsy Ross Bridge and from SR 0095 (MPMS 79903 - SR00095, Sec BR0). These new ramps will serve to accommodate the increased traffic volumes from the removal of the two ramps at the Bridge St. Interchange. One of the ramps to be removed is a deceleration ramp from SR 0095 NB to Aramingo Ave. NB. The other ramp to be removed is an acceleration ramp from Aramingo Ave. SB to SR 0095 SB. The project also consists of relocating the SR 0095 SB deceleration ramp at the Bridge St. Interchange. The ramp is being moved farther north to allow the ramp to meet current design standards and tie into a new road called Relocated Carver Street which outlets vehicles onto Tacony Street. In addition this project will incorporate new traffic signals at 12 intersections and modifications to traffic signals at 5 intersections.

Project CMP (Congestion Management Process) commitments include strategies such as improvements for transit users, bicyclists, pedestrians, and drivers on the existing road network (operations). See DVRPC's annual memoranda on supplemental strategies for details related to this project.

This project is integral to the Delaware Valley Freight Corridors Initiative.

An investment of more than \$2 billion will provide for the repair, reconstruction and restoration of I-95, a major facility built in the 1960's which runs through Bucks, Philadelphia, and Delaware Counties in the DVRPC region. The reconstruction of I-95 has been broken out to over 20 separate MPMS #'s, some of which appear in the Interstate Management Program, which is strictly for reconstruction components, some which appear in the DVRPC Regional TIP, and most which will occur in Later Fiscal Years and are yet to be programmed. MPMS #'s include: 17821 (Section GIR Design: GR0, GR1, GR2, GR3, GR4, GR5), 47811 (Section BSR Design), 47812 (Section BRI Design), 79683 (Section CP1 Construction), 79685 (Section CP2 Construction), 79686 (Section GR1 Construction), 79903 (section BR0 Construction), 79908 (Section BS1 Construction), 83640 (Section GR2 Construction).

**Project Description:** This project provides for the design of I-95 Reconstruction SR 0095 Section BRI, also known as the Betsy Ross Interchange. Section consists of reconstructing 1.1 miles of the SR 0095 mainline roadway starting from south side of the Wheatshaf Lane crossing, adjoining Section AFC, and ending north of Orthodox Street at the south side of the Margaret Street/Lefevre Street crossing, adjoining Section BSR. The lane drops (from 3 to 4) on SR 0095 will be eliminated from the Betsy Ross Interchange crossing to the Margaret Street/Lefevre Street crossing. Within Section BRI, the NB and SB collector-distributor roads, the Ramp X SB on ramp and Ramp Y NB on ramp will be demolished and removed. The proposed SR 0095 mainline will have four lanes in each direction from Wheatshaf Lane to Orthodox Street/Pearce Street crossing. On the SR 0095 mainline, the project includes reconstruction of three dual structures (the dual structures over Frankford Creek; the dual viaduct structures over the Earth Fill area from the Betsy Ross Interchange to south of Orthodox Street crossing; and the dual structures over Orthodox and Pearce Streets). Section BRI includes the minor rehabilitation of the Conrail Shared Assets railroad bridges crossing SR 0095 and Ramps A and C.

In addition, the Aramingo Avenue/Betsy Ross Interchange will be reconfigured to realign the planned Adams Avenue Connector to intersect Aramingo Avenue adjacent to the Frankford Creek Bridge and to accommodate increased traffic volumes from the consolidation of the Bridge Street Interchange. In the Betsy Ross Interchange area, Section BRI also includes reconstruction of eleven connecting bridge structure ramps (Ramp A from SR 0095 NB to Betsy Ross Bridge; Ramp B from Betsy Ross Bridge to SR 0095 SB; Ramp C from SR 0095 NB to Aramingo Avenue; Ramp D from Adams Avenue Connector to SR 0095 SB; Ramp EE from SR 0095 SB to Betsy Ross Bridge; Ramp F from SR 0095 SB to Aramingo Avenue.

This project is funded by a portion of a \$51,254,972 TEA-21 Earmark (PA ID# 228/FED ID# 1847)

Project CMP (Congestion Management Process) commitments include strategies such as improvements for transit users, bicyclists, pedestrians, and drivers on the existing road network (operations). See DVRPC's annual memoranda on supplemental strategies for details related to this project.

Title: I-95: Kennedy-Levick (C)

Improvement Type: Widen

State Route: 95

Municipality: Philadelphia (CITY)

Air Quality Status: Significant: Included in regional conformity analysis

Estimated Construction Bid Date: 10/10/19

Actual Construction Bid Date: 10/10/19

Location: Philadelphia County

**Project Description:** Widen & reconstruct SR 0095 from the relocated Carver Street Bridge to Levick Street: Construct the new Southbound off-ramp to Tacony Street and Arsenal Business Center, remove the existing Southbound off-ramp to James Street, remove the existing Carver Street Bridge, reconstruct Tacony St. north of Bridge Street. Utility impacts under I-95 are anticipated. Bridges to be replaced include Carver, Van Kirk & Comly Street bridges. A new traffic signal will be installed at the intersection of Carver Street and Tacony Street.

Project CMP (Congestion Management Process) commitments include strategies such as improvements for transit users, bicyclists, pedestrians, and drivers on the existing road network (operations). See DVRPC's annual memoranda on supplemental strategies for details related to this project.

This project is integral to the Delaware Valley Freight Corridors Initiative.

An investment of more than \$2 billion will provide for the repair, reconstruction and restoration of I-95, a major facility built in the 1960's which runs through Bucks, Philadelphia, and Delaware Counties in the DVRPC region. The reconstruction of I-95 has been broken out to over 20 separate MPMS #'s, some of which appear in the Interstate Management Program, which is strictly for reconstruction components, some which appear in the DVRPC Regional TIP, and most which will occur in Later Fiscal Years and are yet to be programmed. MPMS #'s include: 17821 (Section GIR Design: GR0, GR1, GR2, GR3, GR4, GR5), 47811 (Section BSR Design), 47812 (Section BRI Design), 79683 (Section CP1 Construction), 79685 (Section CP2 Construction), 79686 (Section GR1 Construction), 79903 (section BR0 Construction), 79908 (Section BS1 Construction), 83640 (Section GR2 Construction).

Title: I-95: Margaret-Kennedy

Improvement Type: Widen

State Route: 95

Municipality: Philadelphia (CITY)

Air Quality Status: Significant: Included in regional conformity analysis

Estimated Construction Bid Date: 8/25/22

Actual Construction Bid Date:

Location: Philadelphia County

**Project Description:** This phase of I-95 Section BSR covers the I-95 reconstruction from just north of Margaret Street to Kennedy Street, and the removal of the northbound I-95 on-ramp at Bridge Street and the removal of the southbound I-95 off-ramp at James Street, which were relocated in the Section BS1 project (MPMS #79908) in the City of Philadelphia. This project includes work to: (1) reconstruct northbound and southbound I-95 (four lanes in each direction) from just north of Margaret Street to Kennedy Street. The viaduct that carries I-95 over Tacony Street and Bridge Street will be replaced; (2) removal of the Bridge Street northbound on-ramp and the James Street southbound off-ramp; (3) reconstruct Tacony Street from Buckius Street to Kennedy Street; (4) modify the traffic signals at Bridge and Tacony Streets, and Bridge and James Streets; reconstruct Bridge Street to reduce the street width and add pedestrian and bicyclist safety features, and construct stormwater outfall(s) to Old Frankford Creek. For an overall description of SR 95 Section BSR section see MPMS #47811.

Title: I-95: Allegheny & Castor Ave Intr Connection

Improvement Type: Widen

State Route: 95

Municipality: Philadelphia (CITY)

Air Quality Status: Significant: Included in regional conformity analysis

Estimated Construction Bid Date: 11/5/20

Actual Construction Bid Date:

Location: Philadelphia County

**Project Description:** Project includes the local road improvements in support of I-95 AF3 and AF4 (mainline I-95) in the City of Philadelphia. The project will optimize signal timings on the local roadway network including Aramingo Avenue, Allegheny Avenue, and Castor Avenue; pavement rehabilitation and reconstruction on Delaware Avenue between Castor Avenue and Allegheny Avenue; the additional of auxiliary lanes at the intersections of Aramingo and Ontario and Aramingo and Venango; new traffic signals at the intersections of Allegheny/Bath, Castor Avenue/I-95 ramp. The project will also include improvements to the Philadelphia Water Department Outfalls from I-95 to the Delaware River to accommodate stormwater management for the reconstruction of I-95. New signing, pavement markings, and lighting will be constructed on Allegheny Avenue, Delaware Avenue, and Castor Avenue which will serve as the connection between the split interchanges (NB interchange at Castor Avenue, SB interchange at Allegheny).

**Title:** I-95 Congestion Managemnt

**Improvement Type:** Miscellaneous

**State Route:** 95

**Municipality:** Philadelphia (CITY)

**Air Quality Status:** Exempt from Regional Conformity Analysis

**Estimated Construction Bid Date:**

**Air Quality Exempt Reason:** M10 - Purch new buses & cars for rplcmnt or mnr expan.

**Actual Construction Bid Date:**

**Location:** I-95 in Bucks, Delaware, and Philadelphia counties

**Project Description:** This project will provide for Congestion Management Activities related to the reconstruction of I-95 through Bucks, Delaware, and Philadelphia counties, via a series of investments to enhance the capacity of the SEPTA regional rail lines parallel and closest to the I-95 corridor. This is to further the ongoing congestion mitigation as the construction activity increases on the corridor. Mainline work will expand on sections CP2 and GR2, to GR3, and GR4 to include the BSR/BRI and AFC sections in the near future. Actual effects of I-95 construction phasing is being monitored, and ridership is currently at capacity for the parallel regional rail. Enhancement of the capacity of SEPTA regional rail would be effective in relieving congestion construction zones. Improvements may include purchase of additional rolling stock; improvements for additional parking at regional rail stations; and yard, interlocking and storage improvements. Efforts may begin with the purchase of available rolling stock.

<b>Total FFY 2021-2032 Cost</b>		<b>\$12,590</b>					

PennDOT Project Id: 112549

Project Administrator: PennDOT

Title: North York Widening #1 (Exit 19)

Improvement Type: Reconstruct

State Route: 83

Municipality: Springettsbury (TWP)

Air Quality Status: Significant: Included in regional conformity analysis

Estimated Construction Bid Date: 7/25/24

Actual Construction Bid Date:

Location: I-83 from 1/2 mile North of Exit 18 to I-83 over Eberts Lane, Springettsbury and Spring Garden Township, York County

Project Description: Reconstruction, Widening and Bridge Replacements and Exit 19 Interchange Improvements from I-83 from 1/2 mile North of Exit 18 to I-83 over Eberts Lane in Springettsbury and Spring Garden Township, York County.
